## PathMaster® WINDOWS® PROGRAMMING SOFTWARE

PathMaster is PVA's proprietary Windows®-based programming software for use on all PVA automated robots. PathMaster utilizes easy to read menu screens and pop-up boxes to allow an operator to build even the most complex programs in only minutes. This flexible programming tool is versatile enough to satisfy all dispensing operations including dot, bead, and spray coating applications. PathMaster is free of charge with any PVA automated system purchase.

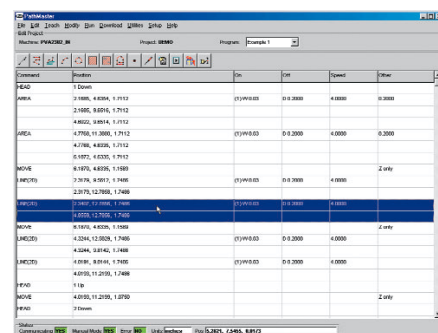

PathMaster has many integrated features including

- ▲ Windows® interface design increases programming simplicity
- ▲ FastPath™ offline programming software
- ▲ FastMask™ area coat programming
- ▲ Line by line editing capability
- ▲ Array building feature allows copying of a program to multiple start points
- ▲ Wet or dry program playback mode
- ▲ Three-dimensional path previews
- ▲ Narrated video tutorial help files demonstrates typical PathMaster functions

For more information on PVA's dispensing capabilities, please contact one of our sales representatives at (518) 371-2684.

PVA offers the following options to augment your programming capabilities:

FastPath™ | Offline Programming Software
