STATIC MIXERS
STEPPED/SLIP LUER OUTLET TIPS
LUER-LOK™ COMPATIBLE OUTLET

PVA static mixers are ideal for any plural component dispensing application. All nozzles feature an oversized bell inlet for integration with any PVA two-component dispensing valve. PVA static mixers are constructed of chemically inert motionless elements and a Polypropylene housing. When working pressure exceeds 150 psi a metal jacket may be recommended.

Available with Stepped/Slip Luer Outlet or a Luer-Lok™ fitting to allow a needle tip to be used.

For more information, please contact PVA at info@pva.net or 1-518-371-2684.
