

# GLOBAL SUPPORT

---

**PVA** is a world class innovator of high quality, repeatable dispensing and conformal coating systems. We manufacture turnkey solutions that help our customers improve their competitiveness. We do that through engineering robust processes that introduce repeatable results that reduce waste, increase throughput, and lower manufacturing costs.

Our flexibility is unmatched as each solution is customized to optimize your manufacturing goals.

Headquartered in Upstate New York, with regional sites stationed throughout North America, Europe, and Asia, all PVA Systems are backed by a 24-hour global service network.

*Create your program.  
Perfect your process.  
Master your path.*

**PVA**

**PathMaster X** is the next generation of programming software designed exclusively for PVA's Direct Series Delta line.

This Windows-based software offers more control and capability than ever with upgraded technology, enhanced programming features, an all-in-one programming and production environment, and a completely customizable platform that can be tailored to your production requirements.

*Experience easier offline programming with the X-PAD controller and full HD resolution LCD touchscreen capable display*

### Sophisticated Technology for Modern Manufacturing

Take control of the machine with a full HD resolution touchscreen LCD display

Eliminate toggling between software and controller with all controls embedded in X-PAD multi-function machine pendant

### Advanced Offline Programming

Enhanced offline programming gives users the freedom to program from anywhere

Programming has never been easier with the ability to drag and drop into a program or onto the canvas

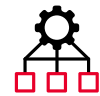

Customizable overlays for nozzle size and pattern width

### Integrated Programming and Production Environments

Includes all the features and functions of PVA Portal and PathMaster in one streamlined application

Control all machine functions and programs in one place for a simplified workflow

Configurable workspace for all applications including conformal coating, dispensing, and custom processes

Customizable controller		✓
Windows-based software	✓	✓
Expanded offline programming		✓
Language support for English, Spanish, French, German and Mandarin	✓	✓
Option to easily modify pre-configured paths or create your own based on application needs	✓	✓
Quickly adjust pattern shapes, placements, and start or stop points		✓
Create dispense profiles for each tool		✓
Real time on screen tracking of whole or partial path previews		✓
