

INNOVATION. **PRECISION.** EXCELLENCE.

Specifications

Degree of Rotation

+/- 50°

Holding Torque

4.0 Nm

PVA-4X-5

5th Axis Programmable Tilt

The 5th Axis Tilt feature is a motorized programmable tilt that can be configured to adjust to any angle between -50 degrees to 50 degrees.

This flexibility allows greater part accessibility for more accurate dispense and spray processes.

The 5th Axis Programmable Tilt has many additional integrated features including:

- Encoder position, verification, and adjustment
- Multiple tilt positions within the same path or across different paths allowing for a wider range of products to be processed with the same cell

For more information, please contact PVA at info@pva.net or contact your local representative.
