

INNOVATION. **PRECISION.** EXCELLENCE.

## **PVA-4XS** Slim 4th Axis

PVA's patented servo-controlled valve four-axis motion with valve title and rotation is available for both Delta 6 and Delta 8 machines.

The 4th axis allows for tilt and rotation of the valve, enabling placement of material in areas that a typical vertical valve orientation cannot reach.

The Slim 4th Axis has many additional integrated features including:

- Economical solution for simple dispensing tasks requiring four-axis motion
- Slim form factor allows the user to multi-tool the machine to simultaneously process two parts

**For more information, please contact PVA at [info@pva.net](mailto:info@pva.net) or contact your local representative.**

## **Specifications**

### **Footprint**

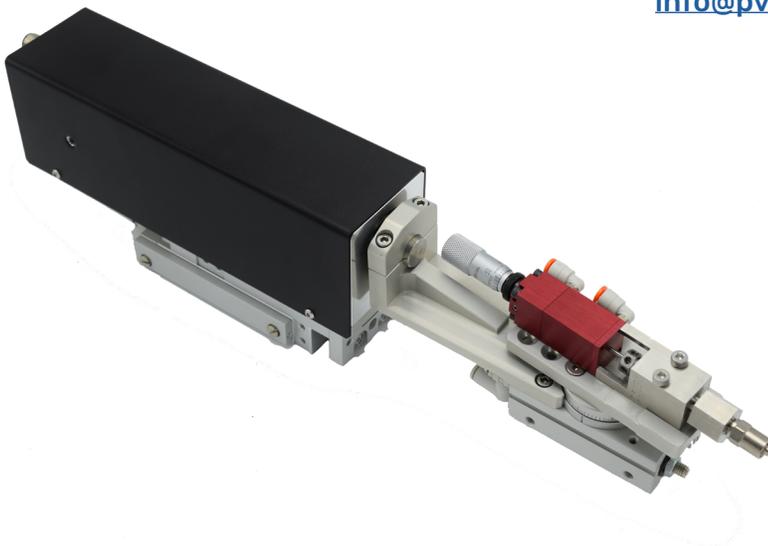

446.27 mm x 99.31 mm x 99.31 mm  
(17.57 in x 3.91 in x 3.91 in)

### **Degree of Rotation**

323°

### **Recommended Valves**

FC Series

REV A - 12/24
